

Cabinet Engineer

Job Type: Full-time, Monday-Friday

Pay: Salary commensurate with experience and skills

Location: Montgomeryville, PA

Positions available: 2

Our company has an exemplary reputation built on our record of providing excellent products, competitive pricing and outstanding customer service for the past 30+ years. We are employee-centric where people build careers because this is a great place to work!

We are seeking experienced digital engineers to join our organization. An ideal candidate will have experience with Cabinet Vision, CAD design software or other design software programs.

Essential Duties:

- Prepare custom cabinet orders for production utilizing CAD, Excel and MRP software
- Communicate with Designers to resolve questions regarding design specifications
- Establish priorities and reorganize work based on flexible production schedule
- Coordinate with Production personnel to prioritize submissions

Skills and Experience:

- Strong communication and listening skills
- Excellent organizational skills
- A great work ethic
- Willingness to grow and learn
- Meticulous attention to detail
- Sense of urgency and good task prioritization
- Drafting (1 year preferred)
- AutoCAD (1 year preferred)
- CAD (1 year preferred)

We Offer:

- Competitive salary
- A supportive, professional and pleasant work environment
- An attractive paid vacation, sick and personal time package
- A 401k plan with company contribution

We are people-oriented, innovative and surround ourselves with good people. If you want to work in a supportive, communicative and collaborative environment, give us a call!
