

THE CLOSET WORKS PRESENTS

CLOSET IDEAS AND TIPS FOR YOUR NEW HOME

ORGANIZE AND LOVE YOUR NEW SPACE

1 Understand Your Needs

Make The Space Work For You

Identify your needs and goals for the space. Consider how often you use the items and if you would like them hung, folded, displayed or concealed. For example, some guys might like their ties rolled up in drawers with dividers while others may prefer a slide-out tie rack.

2 Key Features

Maximize Your Storage Space

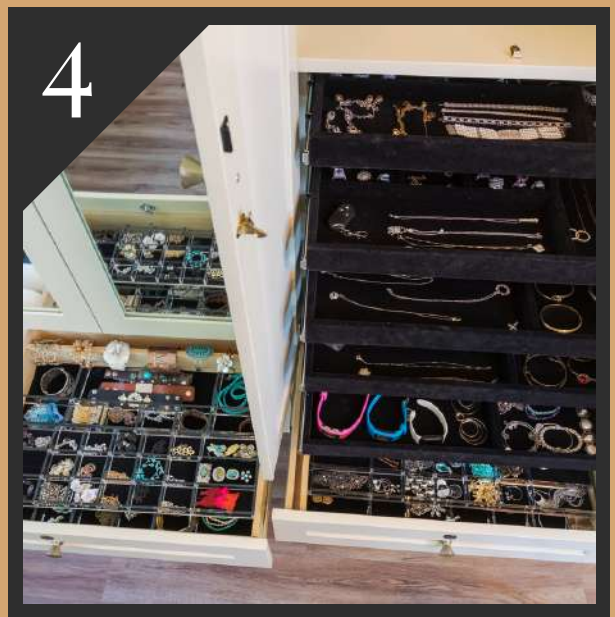

Take advantage of vertical space in order to optimize storage capacity. Pull-down rods are a flexible option which can add an additional layer of hanging and adapt to your changing needs. Utilize space saving items like hidden mirrors and fold away ironing boards.

3 Organization Strategies

The Golden Rule

When it comes to organizing, the goal is to make sure there is place for everything and everything has its own place. Arrange and store clothing in the way that works best for you. You could organize by season, outfit, color or how frequently you wear the items.

4 Take It To The Next Level

Customize For Your Needs

Even if you know what you want or think you know what you want, consider enlisting help from the professionals. They have knowledge of the latest trends and available options.
